

PROJECT PROFILE » THE CITY OF BENTONVILLE

PROJECT TYPE:

69kV Transmission and Distribution Construction

PROJECT SCOPE:

Relocate 69kV transmission and distribution under-build for highway widening project.

DESCRIPTION:

- » Relocate 69kV transmission and distribution under-build and underground taps due to expansion of Highway 102.
- » Installed foundations, spotted, framed and set poles, transferred underground taps and installed new wire.

RESULTS:

- » This line runs parallel to a heavily-congested major highway. There was also road construction going on in the area of our work.
- » Work was completed in 110 working days – two weeks ahead of schedule.
