

## PROJECT PROFILE » DELMARVA POWER & LIGHT

### PROJECT TYPE:

138kV Substation Construction

### PROJECT SCOPE:

Install a 138kV expansion at the Edgemoor substation.

### DESCRIPTION:

- » Installed over 6,000 linear feet of micro-piles to support the new foundations we are installing.
- » The soil conditions at this site were very poor. Our crews completed the foundation, raceway, grounding and erection of steel structures.

### RESULTS:

- » Project was completed on time and on budget.
